Basic Electro CardioGraphy

What every medical
student should know

This 6-hour course aims to provide medical students the knowledge and skills necessary to perform systematic ECG analyses of the normal ECG, of the most common normal variants, of the diagnostic principles of myocardial ischemia and infarction, and of the most important arrhythmias. Finally, rapid ECG interpretation in patients with acute cardiovascular disease will be discussed.

26 January 2022
The Normal ECG

10 February 2022
Myocardial Ischemia
and Infarction

24 February 2022
Arrhythmias

At 6.00 pm
