

Senior Tutors (2014/15)

Senior Tutors offer **supervisions** in the subjects listed below. A full programme of topics, venues and dates of the College supervisions will be published on the College intranet early in November. Additional subjects may be offered later in the year if additional PhD students or post docs will join Volta later this term or early in 2015. Supervisions are informal, small group teaching activities in which topics already covered in formal lectures are re-addressed in College from a different perspective or simply expanded; practical problems related to the topic are set and solved under the guidance of the Senior Tutor and the topic is put in context both within and across subjects. Students of Collegio Volta may wish to know that, in Universities with a Collegiate system, supervisions are the most crucial determinants of examination grades.
